Alternate Access[®] to Exhibit at the 2009 Business Expo
Visit booth #451 to view demonstrations of VoIP phone system solutions for SMBs, as well as the new Courtesy Text[™] short message sender server

Raleigh, N.C. (April 23, 2009) – Alternate Access[®], a leading provider of converged communications solutions, will be an exhibitor at the 2009 Business Expo on May 7. Hosted by the Greater Raleigh Chamber of Commerce, the expo will take place from 9:30 a.m. to 5 p.m. in the Jim Graham Building at the N.C. State Fairgrounds.

Visitors to the Alternate Access booth, #451, will be able to view interactive demonstrations of VoIP phone system solutions designed for SMBs at different stages of business growth. Alternate Access representatives will be available for one-on-one discussions to explain how combining VoIP systems with the latest in VoIP services can help SMBs reduce operational costs and increase employee productivity.

“In these tough economic times, businesses are seeking ways to reduce overall cost of operations. Alternate Access strives to help SMBs take advantage of VoIP and other communication technologies to meet that goal,” Kelly Lumpkin, Alternate Access CEO, said. “As a return exhibitor at the Business Expo, and a small business, Alternate Access values this event as a resource for businesses at every stage of development.”

Each Alternate Access VoIP phone system features an intuitive GUI interface and easy administration that makes them immediately useful to staff, whether they are in the office, mobile or working remotely. Onsite administration capability allows for quick turn around in making changes when needed.

Alternate Access will also demonstrate Courtesy Text[™], a short message sender server that allows suppliers and customers to send simple, bi-directional communications – such as inclement weather notifications, prescription pick-up reminders and appointment confirmations – as a text message to cell phones. Users can send short messages to one or many people directly from a PC or from a database application straight to cell phones.

“We can integrate Courtesy Text with CRM software, so companies can easily contact one person, several people in a department, a specific set of prospects or an entire workforce,” Alternate Access CEO Kelly Lumpkin, said. “The Business Expo is an ideal setting to showcase this product and our wide range of VoIP solutions to the Triangle market.”
